

Description: This configuration guide walks users through using the Manage Custom Exports functionality in the Michigan Data Hub cockpit. This tool allows users to create reports and or exports of data residing in their ODS and are created using pre-built queries identified on <u>www.midatahub.org</u> under the Support > Data Validation Queries section.

Step 1: Login to the Michigan Data Hub cockpit and select Reports > Manage Custom exports:

Michigan Data Hub > State of Michigan > Grand Bend					Hello kevin.bullard@kresa.org! Log off		
Agreements -	Inventory -	Reports -	Utilities -	MSDS +	Milearn +	Features -	
Manage Di	strict: Gr	View Distri Manage C	ct Reports ustom Exports	Michiga	un Data Hub		
ISD/Intermediate District Code : State of Michigan							
District : Grand Bend, Id: 182, Code: 255901 District Type : LEA							
Address:,, URL:							
Current School Year : 2020-2021 (populated) V							
		Jinta	oration Conv	u			
integration server : HUD-ETLS							

Step 2: Select Add new export set:

T

Note: An export set is nothing more than a folder that will hold the queries you want to create. If you are simply adding a query to an existing export set (folder) than select the export set (folder) you would like to add the query to and proceed to step 3.

Export Manager							
Manage Export Sets							
Export Set Name	Date Created	Last Submitted	Actions				
Data Quality	10/07/2020 03:15 PM		Delete Create Download File for 2021-2022				
Data Validation	10/19/2020 02:05 PM		Delete Create Download File for 2021-2022				
Data Validation	10/19/2020 02:08 PM		Delete Create Download File for 2021-2022				
Data Validation for Grand Bend ISD	03/17/2021 02:03 PM		Delete Create Download File for 2021-2022				
New Export	02/22/2021 04:35 PM		Delete Create Download File for 2021-2022				
OneRoster	09/24/2020 10:16 PM		Delete Create Download File for 2021-2022				
OneRoster Demo for Training	09/25/2020 11:33 AM		Delete Create Download File for 2021-2022				
OneRoster Training	10/07/2020 02:40 PM		Delete Create Download File for 2021-2022				
Skyward OneRoster Demo	11/10/2020 03:03 PM		Delete Create Download File for 2021-2022				
Add New Export Set							

Step 3: From the pull down menu select Writing/Pasting the Query in T-SQL

MICHIGAN DataHub Michigan Data Hub > State of Michigan > Grand Bend > Add Export
Add Query
I wish to add my query by:
Writing/Pasting the Query in T-SQL
Using the Query Designer Wizard
Writing/Pasting the Query in T-SQL

Step 4: From the Query Bank pull down menu select the query you would like to use.

<u>Note</u>: Please refer to the list of validation scripts found at <u>www.midatahub.org</u> > Support >Data Validation Queries.

<u>Michigan Data Hub</u> > <u>State of Michigan</u> > <u>Grand Bend</u> > <u>Add Export</u>					
Write Query					
Query Bank:					
Select					
Assessment Inventory					
Assessment Objective Performance Level Validation					
Assessment Objective Score Validation					
Assessment Performance Level Results					
Assessment Score Results Validation					
Attendance Code Utilization					
Attendance Totals by Date					
Calendar Date Event Validation					
Class List Verification					
Cohort Verification Script					
Combined Daily and Section Attendance by Student					
Course Codes with Academic Subjects					
Daily Attendance Verification					
Data Freshness Query					
Diagnostic - Grade Levels not Mapped to CEDS for OneRoster					
Diagnostic - Student Status List					
Diagnostic - Students missing Education Organization Associations					

Step 5: After selecting the query from step 3, you will be presented with a preview screen of the SQL code being used to construct the report.

Click Preview results

Write Query	
Query Bank:	
Data Freshess Query	~
seled 'Assessment' as Category min (CreateDate) as Since max(CreateDate) as Created max(LastModifiedDate) as Lindated count(*) as RecordCount	
from edit.Assessment	I
union	
select 'AssessmentItem' as Category, min (CreateDate) as Since, max(CreateDate) as Created, max(LastModifiedDate) as Updated, count(*) as RecordCount	
from edit.Assessmentitem	
union	
select "AssessmentScore" as Category, min (CreateDate) as Since, max(CreateDate) as Updated,count(*) as RecordCount

Cannel	Provide Provide Deputite
United	Dack Heview Results

Step 6: You will be presented at a screen with multiple options available. The purpose of this preview data screen is to present the user with a few rows of data being returned from the ODS.

Note: Preview ODS Year: The year selected here will be used to run the query. Data will be returned in the query based on the year selected.

When the preview looks accurate click continue:

Preview Data				Preview ODS	Year:
				2020-2021	~
Query Name:					
Data Freshness Script					
Description:					
Provides a list of Ed-Fi tables along with when they were create, how many records and when they were last updated					ļ
Category	Since	Created	Updated	RecordCount	
Assessment	3/21/2019	3/21/2019	3/21/2019	73	
Assessmentitem	3/21/2019	3/21/2019	3/21/2019	1319	
AssessmentScore				0	
Cancel	Create File for Downlo	ad 📥			Revise Query Continue

Step 7: This screen will allow you to download the query in a file type of your choosing.

Note: Select ODS Year: The year selected here will be used to run the query. Data will be returned in the query based on the year selected.

Export Set Name: The name entered here will be applied to the name of the Export set (folder)

Delimitter/File Extension: By default any query created will have the delimiter set as Comma and the File extension configured as *.CSV

Create Another Query: Select this link if you would like to add another query to the Export set (Folder).

When all these options have been confirmed click the "Create Download file for 2021-22" link, it will quickly change to "Download file for 2021-22", click it one more time and the file should download.
